Hose Assemblies

Hannay offers a wide selection of low, medium, and high pressure hose assemblies for a variety of applications such as general purpose air and water, petroleum products, hydraulics, oxygen/acetylene, breathing air, potable water, steam, and pressure washing. These assemblies are available with inside diameters ranging from 3/16" to 3", working pressures from 100 psi to 10,000 psi (7 bar to 689 bar), working temperatures from -65° F to +450° F (-54° C to +232° C), and in most cases at least a 4:1 burst pressure ratio. Hannay also offers 24" flexible connectors for most reels. Please contact our factory with your specific need.

Low Pressure Hose

Our low pressure hose assemblies with inside diameters of 1/4", 3/8", 1/2", and 3/4" have working pressures from 300 psi to 350 psi (21 bar to 24 bar), working temperatures from -40° F to +212° F (-40° C to +100° C) depending on fluid, have a synthetic rubber core and cover with a one textile braid reinforcement. They are designed for use with petroleum-based hydraulic fluids and lubricating oils, water, water/glycol, water/oil emulsion hydraulic fluids, and air. Our low pressure hose assemblies with inside diameters of 1", 1-1/4", and 1-1/2" have working pressures of 200 psi (14 bar), working temperatures from -40° F to +180° F (-40° C to +82° C). They have a blended nitrile core, a neoprene cover, and four spiral reinforcements for the 1" and an EPDM core and cover with a two textile braid reinforcement for the 1-1/4" and 1-1/2" (also available in 1"). The nitrile/neoprene hose is designed for transfer of air and water. The EPDM hose covers these applications, plus it is good for conveying water-based liquid fertilizers, pesticides and other products.

Medium Pressure Hose

Our medium pressure hose assemblies with inside diameters of 1/4", 3/8", and 1/2" have working pressures from 2000 psi to 2750 psi (138 bar to 190 bar), working temperatures from -40° F to +250° F (-40° C to +121° C), and have a synthetic rubber core and cover with one braid of high tensile steel wire for reinforcement. They are designed for use with petroleum-based hydraulic fluids and lubricating oils, water, water/glycol, water/oil emulsion hydraulic fluids, and air.

High Pressure Hose

Our high pressure hose assemblies with inside diameters of 1/4", 3/8", and 1/2" have working pressures from 3500 psi to 5000 psi (241 bar to 345 bar), working temperatures from -40° F to +257° F (-40° C to +125° C), depending on fluid, have a synthetic rubber core and cover with two braids of high tensile steel wire separated by a synthetic layer for reinforcement. They are designed for use with petroleum-based hydraulic fluids and lubricating oils, water, water/glycol, water/oil emulsion hydraulic fluids, and air.

Twin Oxygen/Acetylene Hose

Our oxygen/acetylene grade R hose assemblies with inside diameters of 1/4" and 3/8" have working pressures of 200 psi (14 bar), working temperatures of -40° F to +200° F (-40° C to +93° C), or have an EPDM core and cover with one textile braid reinforcement. This hose is designed for oxygen/acetylene only. Grade T oxygen/acetylene, propane, MAPP gas hose is also available. For oxygen/acetylene reels see Hannay Welding Catalog H-0408-W.

Twin Hydraulic Hose

Our twin hydraulic hose assemblies with inside diameters of 1/4", 3/8", and 1/2" have working pressures from 2000 psi to 5000 psi (138 bar to 345 bar), working temperatures from -40° F to +212° F (-40° C to +100° C), have a polymeric core, abrasion-resistant urethane cover, and braided fiber reinforcement. This hose is not only designed for hydraulic and pneumatic circuits, but has a wide chemical compatibility that covers applications such as agricultural sprays, urethane foam mixers, and fire resistant fluids.

**Note: All spring rewind reels complete with hose are supplied with appropriate hose stop.
(See Ordering & Accessory Guide.)**

REEL POLICIES

Our Guarantee and Service Policy

Equipment manufactured by Hannay Reels, Inc. is guaranteed for two years from date of shipment when installed according to our instructions, given proper care, and used for the purpose for which it is designed.

Equipment which proves to be defective upon our inspection will be replaced free of charge, including freight to the customer. Our responsibility ceases upon delivery to any common carrier and we do not, unless previously instructed, insure shipments beyond point of delivery to such carrier. No material will be accepted for return without a return goods authorization. No allowance will be made for labor charges incurred in making exchanges, replacements or repairs.

Components (including hose and cable) which are manufactured by other vendors will be subject to the warranty terms of their own manufacturers. Also excluded from the general guarantee are normal wear items (including seals, motor brushes, and paint finish).

We reserve the right to modify or alter materials, dimensions, design and construction when necessary to improve the performance of the reel and/or accessories, or to meet delivery requirements.

Failure to use a properly sized circuit breaker with any electric rewind motor will void warranty on motor.

Failure to use a flexible connector with any live hose reel will void warranty on swivel joint.

We expressly disclaim any liability for damage or injuries resulting from the use, operation, service, maintenance or failure of equipment.

Paint Notice

To meet the requirements and performance of vehicle and OEM apparatus paints we recommend our reels be painted with the same or equal paint as used on the specific apparatus the reel is being mounted on.

Hannay Reels will supply any model or custom reel or part with an automotive primer or rust preventative oil finish upon request, allowing application of final coating at your facility. Or at additional cost Hannay can prime / pre-paint all material before final assembly.

In today's regulatory environment this would be the most cost-effective way to meet your finishing standards.

Optional finishes are available for various environmental conditions and should be discussed with the factory.

Standard finish is oven cured enamel. **High performance finishes for demanding and corrosive environments are available at an additional cost. Consult factory for specific requirements.**

Return Goods Policy

All Hannay Reels are built to order. The parts and components are ordered or placed into production as soon as the order is written.

In order to keep the number of returned goods at a minimum, we ask that you use the Hannay Reels Order Worksheet and/or Accessories Order Form when specifying reels with us. These forms can be found in our Ordering and Accessory Guide, H-0415-OA. **Be sure to include any size and/or weight limitations for your installation.**

In the event that an item does need to be returned for credit, repair or replacement, prior approval **must** be obtained from Hannay Reels, Inc. Upon your request, we will fax a Return Goods Authorization form. A signed copy of this form **must** accompany the material when returned to us.

All material must be returned prepaid, unless otherwise noted on our Return Goods Authorization. No return will be accepted that has been damaged due to improper return packaging, tampered with or altered from its original condition. **Equipment specially built to customer specifications and requirements is not subject to cancellation or returnable for credit under any conditions.**

Our restocking and handling fee is a **MINIMUM** of 25% for standard catalog reels and parts.

No material will be accepted for credit when returned without permission. Orders for equipment incorporating variations from catalog listed items are special and are not subject to return.

No allowance will be made for labor or mileage charges incurred in making exchanges, replacements, or repairs.

SPRING REWIND REELS

To handle 3/4" or 1" I.D. hose.

- Standard N series has a narrow frame and compact mounting base.
- Non sparking ratchet assembly.
- Declutching arbor to prevent damage from reverse winding.
- Standard inlet 90° balanced pressure swivel joint 1" female NPT threads.
- Standard outlet 1" female NPT threads.
- Pressures to 1000 psi (69 bar).
- Temperatures from -40° F to +250° F (-40° C to +121° C).
- Consult factory for other pressures & temps.
- 4-way roller assembly
- Constant Tension is available – consult factory.

Optional TR roller position shown

For:

- Fuel Dispensing
(Consult Factory)

- Waste Oil Evacuation
- Air/Water

MANUAL OR POWER REWIND REELS

To handle single 1" through 1-1/2" I.D. hose.

Standard Configuration Shown

Optional Auxiliary Rewind (Ring and pinion shaft rewind unit with removable crank handle)

- For:
- Fuel Dispensing (Consult Factory)
 - Bulk Transfer
 - Suction/Discharge (Consult Factory)

- Heavy-duty reel designed for longer lengths.
- Choose gear-driven crank rewind or chain and sprocket drive powered by an electric, hydraulic or compressed air motor.
- Crank rewind reels supplied with pinion brake and power rewind reels with a comet brake.
- Standard inlet 90° ball bearing swivel joint 1-1/2" female NPT threads and 2" victaulic groove.
- Standard outlet flanged riser 1-1/2" female NPT threads.
- Standard inlet, outlet riser and hub assembly are steel. Optional bronze or aluminum swivel joint and stainless steel hub assembly and riser, are available.
- Rollers may be purchased as accessory items.
- Operate at pressures to 600 psi (41 bar).
- Temperatures from -40° F to +175° F (-40° C to +79° C).
- Consult factory for other pressures & temps.
